UNIT 7 REVIEW

**INSTRUCTIONS:** Find a partner to complete the following Unit 7 review questions. After you've finished, have your partner sign the problem. You can only work each person once before finding another partner. **Make sure to also check your work!**

1. Find the **volume** of the following triangular prism:

$$\frac{(16 \text{ cm} \times 12 \text{ cm})}{2} \times 10 \text{ cm} =$$

960 cm<sup>3</sup>

Did you check your work? (y/n)

Partner signature: \_\_\_\_\_

2. Find the area of the circle below:

$$\text{Area} = 3.14 \cdot 9 \text{ in} \cdot 9 \text{ in}$$

Area = 254.34 in<sup>2</sup>

Did you check your work? (y/n)

Partner signature: \_\_\_\_\_

3. Rena is building a 1:180 scale model of a real castle. Her model has a rectangular base that is 33 feet wide and 44 feet long.

**What is the area of the base of the actual castle in square feet?**

Did you check your work? (y/n)

Partner signature: \_\_\_\_\_

4. Find the surface area of the following triangular prism:

Two triangles:

$$\left( \frac{1}{2} (6 \text{ cm} \times 4 \text{ cm}) \right) \times 2 = 24 \text{ cm}^2$$

3 Rectangles:

①  $7 \text{ cm} \times 12 \text{ cm} = 84 \text{ cm}^2$

②  $7 \text{ cm} \times 12 \text{ cm} = 84 \text{ cm}^2$

③  $4 \text{ cm} \times 12 \text{ cm} = 48 \text{ cm}^2$

Did you check your work? (y/n)

Partner signature: \_\_\_\_\_

Area of base is 7,920

$$7,920 \times 5,940 =$$

47,044,800 ft<sup>2</sup>

240 cm<sup>2</sup>

5. Find the area of the semicircle if the radius is 10 cm.

$$A = 3.14(10\text{cm})(10\text{cm})$$

2

$$= 157 \text{ cm}^2$$

Divide by two b/c semicircle

Did you check your work? (y/n)

Partner signature: \_\_\_\_\_

6. Find the perimeter of the circle if the radius is 10 cm.

$$d = 2 \cdot r$$

$$d = 2 \cdot 10\text{cm} \\ 20\text{cm}$$

$$C = 20\text{cm} \cdot 3.14 = 62.8\text{cm} \\ \div 2 (\text{semicircle})$$

$$\text{add on the diameter! } 31.4\text{cm}$$

$$+ 20\text{cm}$$

$$= 51.4\text{cm}$$

Partner signature: \_\_\_\_\_

7. Find the **volume** of the following composite figure:

Rectangular prism:

$$(8\text{cm})(5\text{cm})(6\text{cm}) = 240 \text{ cm}^3$$

Triangular prism:

$$\frac{1}{2}(8\text{cm})(4\text{cm})(5\text{cm}) = 80 \text{ cm}^3$$

Volume of Composite Figure:

Did you check your work? (y/n)

Partner signature: \_\_\_\_\_

$$320 \text{ cm}^3$$

8.

The above map show a section of downtown Honolulu where the scale factor is 1cm:  $\frac{1}{5}$  of a mile. If the distance on paper between the State Art Museum and the Capitol Building is 3.5 cms, how far is the actual distance?

$$1\text{cm} = \frac{1}{5} \text{ of a mile}$$

$$3.5\text{cm} = ?$$

$$\frac{1\text{cm}}{3.5\text{cm}} = \frac{0.20 \text{ mile}}{x}$$

$$x = 0.7 \text{ of a mile or } \frac{7}{10}$$

Partner signature: \_\_\_\_\_

9. What is the formula to find the **area of a circle**?

$$A = \pi r^2$$

Partner signature: \_\_\_\_\_

10. What is the formula to find **volume**?

$$B \times \text{height} \\ (\text{area of the base})$$

Partner signature: \_\_\_\_\_

11. Find the area of the following triangle:

$$\frac{1}{2}(30)(21) = \boxed{315}$$

Did you check your work? (y/n)

Partner signature: \_\_\_\_\_

12. Find the **circumference** of the following circle:

$$C = d\pi$$

$$C = (18 \text{ in})(3.14)$$

$$\boxed{C = 56.52 \text{ in}}$$

Did you check your work? (y/n)

Partner signature: \_\_\_\_\_

13. In your own words, please describe surface area and volume. What are the differences between the two? When would it be important to find surface area? When would it be important to find the volume of an object?

Surface area → measure of the total area of the surface the object takes up.

Importance: Wrapping an object, painting a room, etc.

Partner signature: \_\_\_\_\_

Volume → Measure of the space an object takes up!

Importance: Filling a container, packing items to be sent out for shipment

14. Create your own problem for your partner to solve. Use the space below to solve your partner's problem.

Solve this problem please! Come see me on 2/6/2020 for the answer.

Find the <sup>radius</sup> area and <sup>diameter</sup> ~~circumference~~ of the following circle:

Partner signature: \_\_\_\_\_

Area = \_\_\_\_\_

diameter = \_\_\_\_\_

radius = \_\_\_\_\_
